SKILLS JavaScript (Node.js, React, Redux, Svelte), Ruby (Rails), SQL/NoSQL (PostgreSQL, MongoDB), HTML5/CSS3

EXPERIENCE

Software Engineer, Intern | Sopossum | Information Services

Aug 2020 - Present

- Built various reactive front-end components in Svelte, including data visualizations of user action logs using Highcharts.
- Led the migration of the front-end app to Sapper to add the benefits of SSR, code-splitting, and routing while maintaining the instantaneous navigation feel of a single-page app.
- Wrote asynchronous JavaScript functions to consume RESTful APIs from the Akka (Scala) backend.
- Developed familiarity with packaging apps into containers and deploying using Docker and Kubernetes.

Project Manager | U-Mind Club | E-Commerce Platform

Jan 2017 - Aug 2019

- Streamlined the collaboration between internal and external engineers by introducing an issue-tracking tool to the project workflow, enabling clear communication and minimizing difficulties from language barrier and time difference.
- Prioritized improvements of the seller central UI through analysis of user feedback data, resulting in a 20% increase in the number of products listed over a quarter.

PROJECTS

SoriCloud | React | Redux | Rails | Postgres | jQuery | webpack | Amazon S3

[live](#) | [github](#)

A single-page web application for streaming music and uploading your own - a SoundCloud clone

- **Redux to enable continuous and non-overlapping audio playback through navigation:** Engineered a slice of front-end Redux state to maintain reference to the currently playing track to implement a site-wide audio player UI.
- **Modular components and DRY code:** Leveraged Redux actions with the modular SeekBar component to sync the main audio player with interactive waveform visualizations and play-pause toggle buttons.
- **Scalable backend design with database indexing & prevention of N+1 queries:** Designed RESTful APIs and optimized queries by indexing foreign IDs and eager-loading Active Record associations to extract data from multiple tables in one request.
- **Reduced server load:** Integrated Amazon S3 with Rails and Postgres for cloud storage of media uploads.

Museic | React | Redux | Node.js | Express | MongoDB | Amazon S3

[live](#) | [github](#)

A social web application with a unique UI to record and share short melodies

- **Custom piano component & lightweight storage of music:** Created a piano keys interface with React and Tone.js that allows for user input to be saved directly into the database as an array of music notes, eliminating the need for audio file storage.
- **Dynamic visualization of user input:** Built a visualization component that draws user input notes to the DOM in real-time by using simple math with React and CSS, enhancing user engagement and interactivity.
- **Secure user auth:** Encrypted user details via the JSON Web Token (JWT) library to be sent over HTTP using Axios.
- **Git workflow:** Facilitated collaboration by managing Git workflow, and demonstrated the ability to work on others' code.

Animated Image Histogram | JavaScript | HTML5 Canvas | CSS3

[live](#) | [github](#)

A fun, interactive program to turn any image into an image histogram

- **Canvas API and JavaScript for pixel by pixel manipulation:** Devised an algorithm to extract information from and calculate animation details for all pixels in $O(n)$ time. Executed animation using only JavaScript and canvas API.
- **Responsive web and mobile design with CSS media queries:** Designed an intuitive interface that allows users to adjust various parameters to customize their animations and to capture stills and videos.

EDUCATION

Software Engineering | App Academy | San Francisco, CA

Fall 2019

- Topics: OOP, REST, scale, TDD, algorithms, computer science concepts, software design, and programming best practices.

Bachelor of Science | Duke University | Durham, NC

Aug 2008 - May 2012

- Bachelor of Science in Psychology, Minor in Statistical Science, Certificate in Markets and Management
- Honors: Graduation with Distinction May 2012, Dean's List Fall 2010
